

## Vehicle-Mounted Radioactive Detection System

---

| Nuclear Radiation Detector

☰ Details Info

### Features:

can meet the requirements of the The United States National Appliances Manufacturers Association  
34.5L plastic scintillation detector  
double-deck protective layer for temperature (-20°C to 50°C, Relative humidity 95%)  
detectivity: 50 nSv/h (speed 10 km/h, 1 m away from the detector)  
Dc power supply: 24V@1.5 A
